Interests

Reading, Music, Badminton, Kabaddi

Summary

Skilled, Innovative and deadline-driven **certified Full Stack Web Developer** with **one year of training experience** with problem-solving abilities in developing interactive, responsive and user-friendly web applications.

Training Experience

AlmaBetter

Feb 2023- Present
Bangalore (Remote)

Web Development Trainee

- Completed **Full Stack Web Development program**, specialized in **MongoDB, Express, React, NodeJS, MySQL, HTML, CSS, JavaScript, Redux, Git, and GitHub**.
- Developed **responsive** web applications using **React** and implemented Redux for **seamless user interactions** and **data management**.
- Hands-on experience in creating visually appealing and user-friendly websites with **HTML** and **CSS**.
- Demonstrated proficiency in both **NoSQL** databases like **MongoDB** and relational databases such as **MySQL**, ensuring versatile and scalable data storage solutions for various project requirements.

Academic Projects

Cryptocurrency Dashboard

AlmaBetter verified Project

Jul 2023-Aug 2023

Deployment Link

- Developed a **Cryptocurrency Dashboard** for tracking and analyzing various cryptocurrencies, displaying them in the form of charts and tables., and integrated it with an exchange feature.
- Utilized **ReactJS** for **frontend development** of dashboard, **Tailwind CSS** for creative and responsive layout.
- Integrated **third-party Coin Gecko APIs** to fetch historical prices, real-time market values, and trading volumes, displayed through interactive **React Charts**

ReactJS, Redux Toolkit, Coin Gecko API, React Charts

Get YouTube Subscribers

AlmaBetter Verified Project

Oct 2023

Deployment Link

- Provides **RESTful APIs** with endpoints for managing **YouTube Subscriber's** data retrieval in JSON format.
- The project is built using **Node.js** and **Express** and uses **MongoDB** as the database to store the subscriber data.
- Implemented endpoints for:
 - Retrieving all subscriber's data.
 - Obtaining subscriber's names and subscribed channels.
 - Fetching detailed subscriber information by ID, including name, subscribed channel, and subscription date.

NodeJS, ExpressJS, Mongoose, swagger
